

# TOUCH-PLATE®

## 5000 Series

### The 5000 Series:

The Touch-Plate® 5000 switches offer budget pricing with dependable performance. The 5000 series is available with one, two, or three switches. The plastic cover attaches into mounting holes with no exposed screws. These switches are designed for use with any new low voltage control system and are exact replacements for switches in older Touch-Plate® lighting control systems.

### Features:

- Two-wire push button momentary switch
- One, two, or three switches in a single wall plate
- 5000 style not pilot lit
- Switch rated 4A @ 28 VAC

### This Model:

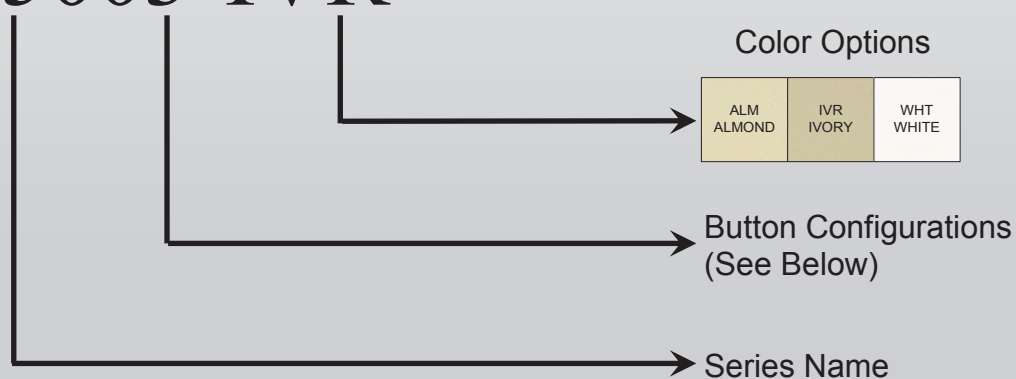

5003-IVR

Offered as a complete system per color  
(includes cover).
