

Touch-Plate® Lighting Controls

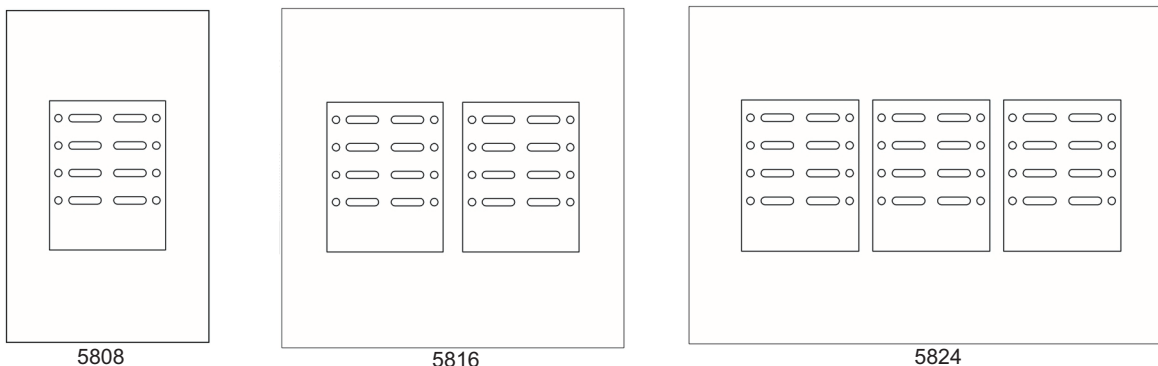

5800 Series / Low Voltage Switches

The 5800 Series:

The Touch-Plate 5800 Low Voltage Switch is an attractive yet economical master control station. It has the same tactile feel as the Ultra and Eclipse Series. It is only available in an 8 button/8 LED combination per gang, with either a plastic or metal cover plate. The metal wall plates and frames are available in several finishes. 5800 switches are the perfect solution for a master control station at an affordable price.

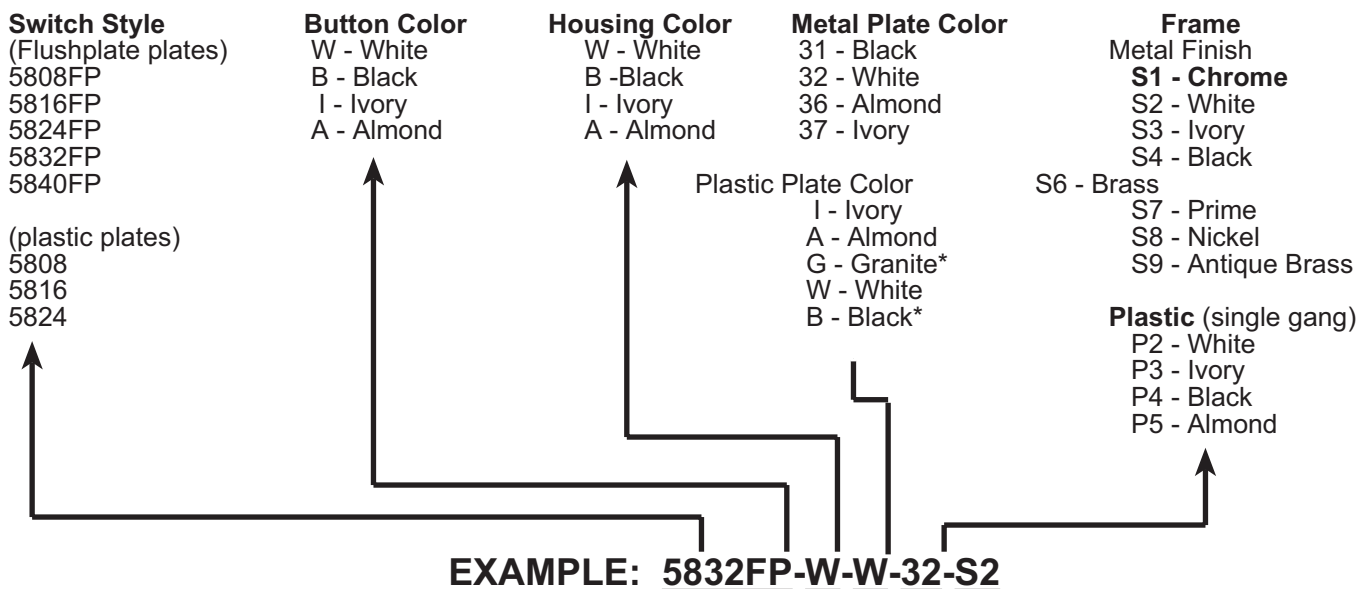

Features

- 2 wire momentary push button switch
- Green LED pilot light
- Custom multiple-gang sizes available - contact factory
- Area under each button for engraving or labels
- Simplified wiring to labeled terminals

Ordering Information:

The catalog number guide shows the variations available and assists in building a catalog number for ordering purposes. To order, follow the example shown below. Switches come standard in a plastic cover plate, with a metal flushplate available as an upgrade. * Granite and Black plastic cover in 1 gang only.
