

TOUCH-PLATE[®]

2 Wire - Non Polarized, Topology Free Control Stations

The Ultra-2W:

The Touch-Plate[®] Ultra 2 Wire-Non Polarized, Topology Free Control Station is a world class product that allows for greater control capabilities with less wiring. Only two wires are needed to connect the Ultra-2W.

The Ultra-2W is available in two, four, or six button-configurations. This control station is also available in a multi-gang configuration to accommodate most control applications.

Features:

- Only 2 wires required (power and data are combined)
- Easy to connect, no polarity to wires
- Flexible wiring—star, daisy chain, or combination of both
- Cable runs up to 500 feet, with a maximum of 10 stations on the same cable run
- RGB LED pilot indicator for each button, with up to 7 colors to choose from
- Pilot color and intensity are configurable
- Color options: white, ivory, light almond, and black
