Lighting Controls

CONTROL PLUS SERIES *DMX* LIGHTING CONTROL PANELS

The Control Plus Series DMX lighting control panels have been designed to provide ON/OFF control of the lighting by the DMX theatrical lighting control equipment.

- Keypad configurable inputs and relay outputs with virtually unlimited switching combinations in *Deluxe* mode
- Local Switch Control
- UL Listed 916 & 508
- Manual Override for every Relay
- Easy to Install; Easy to Start Up
- Heavy Duty Latching Relays
- Factory Pre-Assembled and Tested

CONTROL PLUS SERIES

DMX

The Control Plus Series DMX panels are UL approved, pre-assembled, modular control panels designed to handle all the non-dim, DMX controllable loads associated with theatrical and architectural control systems. Using 20 amp @ 277 VAC mechanically latching relays, they offer reliable and cost-saving controls.

Each Panel consists of 16 gauge steel enclosure, with a hinged, locking cover, a single primary (120 or 277 VAC) transformer, and the heavy-duty Touch-Plate 4000-PL 20 amp relays. In addition, every panel has a Master Control Board (model number 10016) and DMX Slave Boards (model number 10012) as required. The Master Control Board handles all the intelligence for the system. Standard sizes are 8, 16, 24, 32, 40, and 48 relays.

They are to be used in conjunction with a DMX control unit which transmits the appropriate DMX channel command. The CPS-DMX panel responds accordingly, based on setting the DMX address on the Master Board. The address setting is used as the start address for the entire panel in Standard mode. For instance, an address of 001 means that the first relay will be at address 001, the second relay will be 002, the third relay will be 003, and so on. In Deluxe mode each relay can be assigned its own DMX address and multiple relays on a single DMX address.

The CPS-DMX series of control panels are perfect for all theatrical control environments, DMX controlled architectural systems and applications involving theme parks, civic centers and retail stores.
