

# TOUCH-PLATE<sup>®</sup>

## ECLIPSE

### **The Eclipse:**

The Touch-Plate<sup>®</sup> Eclipse switch offers a distinctive style with small horizontal buttons.

The same great feel and response as the Ultra series, but in a more economical plastic cover package.

A wide range of button and LED configurations are available to accommodate most control applications. The Eclipse is an extremely reliable switch at a very affordable price.

It can be used in any low voltage control system. Models are available to control old systems from GE<sup>®</sup> and Remcon<sup>®</sup>, as well as all new systems by GE<sup>®</sup>, Watt Stopper<sup>®</sup>, and Square D<sup>®</sup>, by simply requesting the 24VDC shared common version.

### **Features:**

- Two-wire push button momentary switch
- Multiple switch and LED configurations
- Housing has engraving capability
- LED option in Blue or Green
- Two and four button versions designed to be compatible with 3-wire low voltage systems

### **This Model:**

ECL-4B-4L-IVR  
Offered as a complete system per color (includes cover).
