Touch-Plate®
Lighting Controls

ZΩNΣZ

The ZoneZ-RP:

Touch-Plate® Lighting Controls ZoneZ-RP is the single point lighting control solution for hospitals, hotels, and all other projects requiring remotely installed relays.
A ZoneZ-RP is a complete relay and power supply, making ZoneZ-RP a stand-alone solution for any lighting load that needs to be controlled from more than one location.

ZoneZ-RP is available in two styles, a plastic case with threaded nipple or mounted on a metal sub-plate, depending on the installer's preference.
It is available as a momentary contact switching device or a maintain contact switching device; normally open or normally closed. It will work perfectly as a power pack for any occupancy sensor or as an Automatic OFF

**ZNZ-RP-20-NM Pictured Above with Case**

ZoneZ-RP Features:

•Multi-Way Switching, which allows for ZoneZ-RP to be controlled by multiple control stations
•LED / Pilot Output, which allows the use of control stations with LEDs.
•Switches 120VAC
•Operates a 20 AMP Relay.
•Two distinct designs, one is threaded nipple to junction box, the other is mounted on metal subplate for mounting into a 4 x 4 handy box.
•Electronic Stuck Switch Protection
•Free phone support
•Wiring follows historical Touch-Plate® colors; Orange for Cycle Switch, Blue for LED Status Output, and White for both Commons
•UL listed 20 AMP Relay and Transformer
